

Private Hospital Benefits at the Healthscope Group

ACA Health is committed to providing members with private hospital cover options which represent the highest quality and best value. To meet this commitment to you, ACA Health has agreements with over 480 private hospitals across Australia. These agreements set the prices that you as a member pay, and the quality of services you must receive, when you are treated in those hospitals.

To achieve these results efficiently, ACA Health is part of the Australian Health Service Alliance (AHSA) buying group who does these negotiations on our behalf.

One of these agreements is with Healthscope Group of Hospitals (listed in the attachment to this letter). These hospitals, owned by North American Private Equity firm Brookfield, provide a range of medical, surgical, psychiatric and rehabilitation services.

Regrettably, to date AHSA and Healthscope have not been able to reach agreement on the terms and conditions of a new agreement. As a result, the current agreement will terminate effective from the 4th March 2025.

For the convenience of patients and ACA Health member's transitional arrangements are available as follows:

- If your treatment commenced prior to 4th March 2025 and you are discharged after 4th March, then the old contract will apply to the whole admission.
- If you have pre-booked a procedure before the 4th of March, then you are treated under the old contract.
- If you are pregnant and are booked for your delivery at one of the Healthscope hospitals before the 4th of March, then the old contract applies for 9 months from the 4th of March.
- Patients who are already undergoing a course of treatment (e.g. chemotherapy, dialysis, rehabilitation) continue to be treated under the old contract for 6 months after the 4th of March.
- If you require an emergency admission (please see the definition below*) then you continue to be treated under the old contract for 3 months from the 4th of March.

Therefore, if you require treatment at one of the Healthscope Group of Hospitals (listed below), please talk to your surgeon and arrange to book your admission prior to the 4th of March so that your hospital stay is covered under the transitional arrangements.

What happens if you choose to go to one of the Healthscope hospitals after the 4th March 2025?

The Fund pays second tier default rates, and the hospitals can charge out of pocket amounts to patients. It is very important that you understand what your out-of-pocket expenses will be before your admission as these are not claimable. Please request a quote from the hospital before booking and discuss your options with your surgeon.

ACA Health has contracts with hospitals and a list of contracted hospitals is supplied for your reference below.

We apologise for any inconvenience you may be caused; you may wish to raise any concerns with the hospital as they terminated the agreement.

We are aware that accessing the Healthscope Group of hospitals is important, but that it is also important that private health insurance remain affordable. We remain hopeful that negotiations will be able to recommence in time. Until then please discuss your options with your surgeon and should you experience any difficulties, do not hesitate to call ACA Health's Customer Service Team on 1300 368 390.

** The definition of emergency will include any of the following:*

- *At risk of serious morbidity or mortality and requiring urgent assessment and resuscitation.*
- *Suffering from suspected acute organ or system failure.*
- *Suffering from an illness or injury where the viability of function of a body part or organ is acutely threatened.*
- *Suffering from a drug overdose, toxic substance, or toxin effect.*
- *Experiencing severe psychiatric disturbance whereby the health of the patient or other people is at immediate risk.*
- *Suffering from severe pain where the viability or function of a body part or organ is suspected to be acutely threatened.*
- *Suffering acute significant haemorrhaging and requiring urgent assessment and treatment.*
- *Patient requires immediate admission to avoid imminent morbidity or mortality and where a transfer to another facility is impractical.*
